technical manual for applicants who are preparing for their private commercial or flight instructor pilot certificates with a helicopter rating also could be aid in training students contains detailed coverage of helicopter aerodynamics performance and flight performance includes items such as weather navigation radio navigation and communications 81 charts and tables

this book is not a substitution for the helicopter flight manual and should not be treated as such it is intended to give further information relating to the different sections of the flight manual and to explain the helicopter systems more clearly i have added in some extra information where i felt it would be beneficial but overall i have tried to keep the book as simple as possible while still covering all the sections in the flight manual this book will not teach you how to fly the aircraft however it will give you the necessary technical information to conduct your flight safely it is written with the new jet ranger pilot in mind it is assumed that you already hold your private pilot s licence and have limited or no previous jet ranger experience you should be familiar with flying techniques as this book will not teach you how to fly

an official publication of the federal aviation administration this is the ultimate technical manual for anyone who flies or wants to learn to fly a helicopter if you re preparing for private commercial or flight instruction pilot certificates it s more than essential reading it s the best possible study guide available and its information can be lifesaving in authoritative and easy to understand language here are explanations of general aerodynamics and the aerodynamics of flight navigation communication flight controls flight maneuvers emergencies and more also included is an extensive glossary of terms ensuring that even the most technical language can be easily understood the helicopter flying handbook is an indispensable text for any pilot who wants to operate a helicopter safely in a range of conditions chapters cover a variety of subjects including helicopter components weight and balance basic flight maneuvers advanced flight maneuvers emergencies and hazards aeronautical decision making night operations and many more with full color illustrations detailing every chapter this is a one of a kind resource for pilots and would be pilots

preface acknowledgments table of contents chapter 01 introduction to the helicopter chapter 02 aerodynamics of flight chapter 03 helicopter flight controls chapter 04 helicopter components sections and systems chapter 05 rotorcraft flight manual chapter 06 weight and balance chapter 07 helicopter performance chapter 08 ground procedures and flight preparations chapter 09 basic flight maneuvers chapter 10 advanced flight maneuvers chapter 11 helicopter emergencies and hazards chapter 12 attitude instrument flying chapter 13 night operations chapter 14 effective aeronautical decision making glossary index

this manual has been produced for students undertaking their basic helicopter training it concentrates on explaining not only how and why the helicopter flies but also on the correct handling techniques needed to master the flying exercises required to obtain a helicopter pilot s licence

the simplified text together with an abundance of diagrams will greatly assist the student to become a better and safer helicopter pilot this is a revised and updated new edition for 2007 a manual for students undertaking their basic helicopter training covering principles of flight and helicopter handling illustrations throughout

whether you are a student pilot studying to get a license or a qualified pilot learning to fly the robinson r44 helicopter this is the book you need all of the helicopter systems are described in detail with lots of pictures and diagrams to help you find every piece of equipment you need this book is not a substitution for the pilot s operating handbook and should not be treated as such however it will give you further information relating to the different sections of the flight manual and to explain the helicopter systems more clearly this is essential for any pilot pilots need to understand the aircraft systems thoroughly and will regularly be tested on their knowledge during flight checks everything you need to know is in this book the preflight checklists and start up procedure are described in great detail photos and diagrams show the location of difficult to find parts extra information has been added wherever possible and there is an added section describing the flight maneuvers for the r44 helicopter this book will not teach you how to fly the aircraft however it will give you the necessary technical information to conduct your flight safely
